

CHECKPOINT EAS CATALOG

CHECKPOINT EAS SOLUTIONS CLASSIC CLASSIC CLASSIC HARDWARE

ANTENNA RANGES

- ✓ Installed at entrances, exits, staff exits and possibly toilet facilities in your store.
- ✓ Transmits low frequency radio waves at the same frequency as the tags.
- ✓ Checkpoint NGL and EVOLVE iRange 360 RF Pulse listen systems are based on transceiver technology and therefore can operate as a single stand alone antenna.
- ✓ The technology is harmless and will not affect pace makers, hearing aids etc.
- ✓ When a tag enters the detection field an audible alarm is heard.
- ✓ The visible and audible alarm lasts for approx 5 seconds before automatically resetting.
- ✓ If a tag is left within the detection field the alarm will sound continuously until removed.
- ✓ All antenna systems require testing each day using a special 'Test tag'.
- ✓ The store manager is ultimately responsible for testing and reporting faults.
- ✓ It is essential that each and every alarm activation is responded to.

CLASSIC RANGE

Offers the recognised benefits of Checkpoint Design, Quality and Detection in affordable design options.

EVOLVE iRANGE

Checkpoints premier range, designed with maximum detection and maximum control with clear KPI driven management tools. Comes complete with full range of data accessories to help retailers to grow profitably.

EVOLVE EXCLUSIVE RANGE

An exclusive collection of designer based solutions. For retailers who store designs require something more Exclusive. All based on evolve technology for the best of the best.
