SOLUTIONS • SALES • SERVICE

METO provides high quality sequential numbering tools for garment manufacturers and other specialised markets that require the ability to identify and count items with a manual yet affordable solution.

METO Proline 822 PA

- *Consistent print quality mechanism*
- *Ergonomic design*
- *Easy and clean ink change*
- *Durable and reliable*
- *Standard and custom layout*

Universal Pressure Device Mechanism (UPD)

Constructed with a Universal Pressure Device mechanism (UPD), all labelling tools from METO are designed to offer you consistent print quality every time, while reducing user fatigue.

Durability

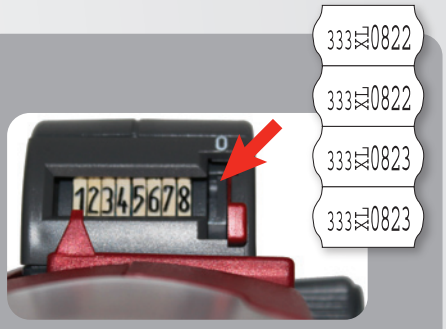
All METO labellers can be fully serviced with a full range of parts and are backed by industry-leading warranties.

Three Variable Settings

METO numbering tools can be configured in three different settings for maximum flexibility to cover all your needs.

Constant pagination to indicate a complete batch.

Consecutive numbering to indicate one layer or automatic counting.



Consecutive numbering after every second label to identify left and right pre-cut parts.

Layout Customisation

METO Numbering Tools can be easily customised to meet your specific layout and labelling requirements.
